

FOR TEACHERS

How Fullmind teaches live

Every Fullmind class is taught live by a certified teacher, in real time. Each district decides whether educators teach its curriculum or curate instructional materials based on state standards and student needs. These are the practices we recommend for every session, whether a teacher is leading a full class, a small group or one student.

**A clear objective, every session**

Each lesson starts with a clear, measurable objective, so students know what they are learning and why it matters.

**Teach it, then show it**

Direct instruction comes with modeling and demonstration, so students see the thinking before they try it on their own.

**Short, focused mini-lessons**

New ideas arrive in focused chunks, with time to practice right away instead of long stretches of listening.

**Every student participates**

Engagement is planned into every lesson. Students answer, discuss, solve and share, not just watch.

**Check before class ends**

A quick check for understanding closes each session, so teachers and schools can adjust the next lesson.

**Aligned to standards**

Lessons follow state standards, using the district's curriculum or materials the educator curates for students' needs.

WHAT A SESSION LOOKS LIKE

From the first minute to the last

1

Set the goal

The teacher shares the objective and connects it to what students already know.

2

Teach and model

A focused mini-lesson, with the teacher demonstrating each step.

3

Practice together

Students work through problems live, with feedback in the moment.

4

Check and close

A short check for understanding shows what stuck and what is next.

IN PRACTICE

Teaching well, together

Partner with the school

When the service includes it, Fullmind teachers work closely with each student's school-based teacher and the team on the ground, sharing progress and planning together.

Build routines from day one

Clear expectations for behavior, participation and work, set early and used consistently, help students feel secure and focused.

Support every learner

Teachers plan around each student's needs, including IEP and 504 plans, and use tools like captions so every student can follow along.

Keep families in the loop

When applicable, communication with students and families is timely, caring and professional, and stays within Fullmind's secure platform.

Prioritize setting expectations and making connections with students even more than you would in-person.

Carolyn Reynolds · ELA Teacher, Excellence in Teaching award recipient

Establish routines from the start. Setting clear expectations and being consistent with students helps everyone create a stable and productive learning environment.

Pam Stanford · Math Teacher, Excellence in Teaching award recipient

OUR COMMITMENTS TO STUDENT SAFETY

- A professional, distraction-free classroom, with camera and microphone on
- Sessions are recorded to protect students and teachers
- Every educator follows mandated reporting requirements
- All communication stays inside a secure platform; personal contact details are never exchanged
- A clear protocol to act quickly if a student is in crisis
- Every educator completes a background check before teaching
