

CAREER & TECHNICAL EDUCATION

Teaching CTE with Fullmind: what to look forward to

Many schools want to offer career pathways but can't find a qualified instructor. Fullmind brings certified CTE teachers into those classrooms, live, so students can explore careers before they graduate.

**Share your field**

Bring your subject expertise to students who might not otherwise have access to your pathway.

**Teach to your certification**

Choose CTE assignments that match your certification, or the reciprocity you are pursuing in a new state.

**A partner in the room**

An in-person facilitator works alongside you, so hands-on activities and equipment are handled safely on site.

**Built around the school's program**

Teach the school's CTE courses and sequences, aligned to its standards and pathway goals.

**Live, not recorded**

Real-time instruction, demonstrations and feedback, the way career skills are best taught.

**Following the school calendar**

Assignments follow each district's school year and bell schedule.

HOW HANDS-ON LEARNING WORKS

Teaching career skills from a distance

**Demonstrate, then coach**

You model the skill on camera; students practice in the room while you watch, guide and give feedback.

**Plan labs together**

Coordinate with the on-site facilitator on materials, safety and setup before each hands-on lesson.

**Keep it real-world**

Connect lessons to careers, industry expectations and what students can do after graduation.

**Track progress**

Record student progress and share it with the school, just as in any Fullmind class.

SUPPORT FROM DAY ONE

You won't teach alone

**Getting started**

Resources to understand each district's curriculum, policies and expectations before you begin.

**Instructional support**

Help with lessons, planning and teaching questions whenever you need it.

**A support team**

Real people ready to help with technology and scheduling, by chat or email.

**A community of educators**

Connect with fellow Fullmind teachers and keep growing with professional development.

WHAT WE LOOK FOR

- A valid state CTE certification for your pathway (or open to pursuing reciprocity)
- A short virtual teaching demonstration
- At least 3 years of experience as a professional educator
- A background check

OUR COMMITMENTS TO STUDENT SAFETY

- A professional, distraction-free classroom, with camera and microphone on
- Sessions are recorded to protect students and teachers
- All communication stays inside a secure platform; personal contact details are never exchanged
- A clear protocol to act quickly if a student is in crisis
